Learn Locally with TUS

Certificate in
Logistics and Supply Chain Management

This programme aims to provide the learner with a comprehensive knowledge and understanding of the concepts and principles of logistics and supply chain management in an organisation. The learner will acquire the knowledge and skills to work in a variety of logistics and supply chain scenarios and will be equipped to identify, analyse and manage complex challenges in this functional area of an organisation.

Logistics and supply chain management are playing an increasing critical role in the growth of organisations and businesses in national and international markets. The programme covers the logistics and supply chain management principles necessary for the achievement of effective distribution and logistics channels.

This programme will give learners the opportunity to further their skill, or re-skill and make a positive contribution to the economy through gaining an understanding of the dynamics of business and in particular from a warehousing, transport, distribution, exporting and customs perspective ensuring they are better at making decisions, solving problems and skilled for the workplace of the future.
